

4 Courses

**What is “the mind” and
what is artificial
intelligence?**

**Methods for Solving
Problems**

Computational Vision

**Interpersonal,
Developmental, and
Evolutionary Perspectives of
the Mind**

Chuong Quoc Nguyen

has successfully completed the online, non-credit Specialization

Mind and Machine

In this specialization, learners examine the ways in which our current understanding of human thinking is both illuminated and challenged by the evolving techniques and ideas of artificial intelligence and computer science. Our collective understanding of “minds” – both biological and computational – has been revolutionized over the past half-century by themes originating in fields like cognitive psychology, machine learning, neuroscience, evolutionary psychology, and game theory, among others. This specialization allows learners to focus on both the larger “historical” arc of these changes, as well as current research directions and controversies.

David Quigley
Research Associate,
Institute for Cognitive
Science
Instructor, Department
of Computer Science
University of Colorado
Boulder

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
